LIMITED-RELEASE SPECIAL REPORT

# ELON MUSK WARNS AMERICA WILL "1,000% GO BANKRUPT"

What his extraordinary prediction could mean for your retirement - and how physical gold may help you prepare.

AMERICAN
HARTFORD GOLD

**WHY MUSK SAYS AMERICA WILL "FAIL AS A COUNTRY" - AND WHAT HE BELIEVES COULD STOP IT**

## There Is No Way Out of America's Debt Crisis...

# Without AI, Musk Says

**"WE ARE 1,000% GOING TO GO BANKRUPT AS A COUNTRY AND FAIL AS A COUNTRY, WITHOUT AI AND ROBOTS."**

**- Elon Musk**

**Musk believes only AI and robotics can generate enough productivity and economic growth to outrun America's rising debt.**

### If the AI breakthrough doesn't arrive in time

- Debt keeps climbing.
- Interest consumes more tax revenue.
- Washington borrows even more just to keep up.
- Pressure builds for higher taxes and expanded money creation.
- The dollar risks losing more purchasing power.

# $40T+

## CURRENT NATIONAL DEBT

US Annual Revenue: **$5.26 trillion**
US Annual Budget: **$7.01 trillion**
US National Debt: **$40.00 trillion**

**Now scale that down to a personal level**

Say your neighbor earns **$52,600 a year**, spends **$70,000**, and is already **$400,000 in debt**.

## Would you lend them more money?

### WHERE THE NUMBERS GO BY 2036

2026 level | Projected growth by 2036

ANNUAL DEFICIT

**~$1.9T**

Projected for fiscal 2026

2026 $1.9T **$3.1T by 2036**

**+63%** over ten years

The government is on track to borrow roughly $1.2 trillion more each year than it does today.

DEBT-TO-GDP

**101%**

Debt held by the public, 2026

2026 101% **120% by 2036**

**+19 pts** over ten years

Debt held by the public passes its post-WWII record and keeps climbing relative to the size of the economy.

ANNUAL INTEREST COST

**~$1T**

Net interest paid in 2026

2026 $1.0T **$2.1T by 2036**

**+110%** over ten years

**Interest is the fastest-growing line in the federal budget** - more than doubling, and crowding out other spending.

Figures are approximate. Debt-to-GDP refers to debt held by the public. Ten-year projections follow the Congressional Budget Office baseline, The Budget and Economic Outlook: 2026 to 2036; current debt outstanding per the U.S. Department of the Treasury.

WHAT BANKRUPTCY COULD MEAN

# America May Never Technically Go Bankrupt..

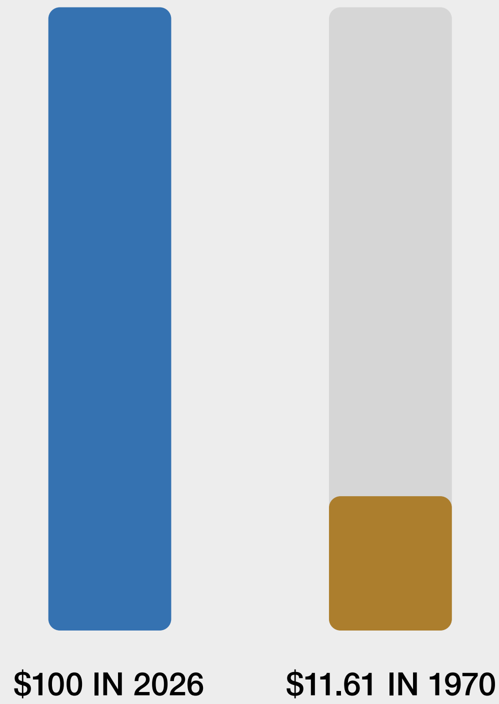
## But endless money printing could devastate the dollar - and your savings.

### THE FEDERAL GOVERNMENT ISSUING MORE CURRENCY TO AVOID BANKRUPTCY COULD PRODUCE:

- **Additional borrowing**
- **Higher taxes**
- **Financial repression**
- **Persistent inflation**
- **A decline in purchasing power**

### THE DOLLAR'S PURCHASING POWER

$100 in 2026 has roughly the same purchasing power as $11.61 in 1970.



**About 88%** decline in the dollar's purchasing power since 1970

Americans do not need to wait for an official default to feel the effects of deteriorating fiscal conditions.

Source: Federal Reserve Bank of Minneapolis purchasing-power comparison cited in the attached Moneywise / Yahoo Finance article; percentage decline derived from the same two figures.

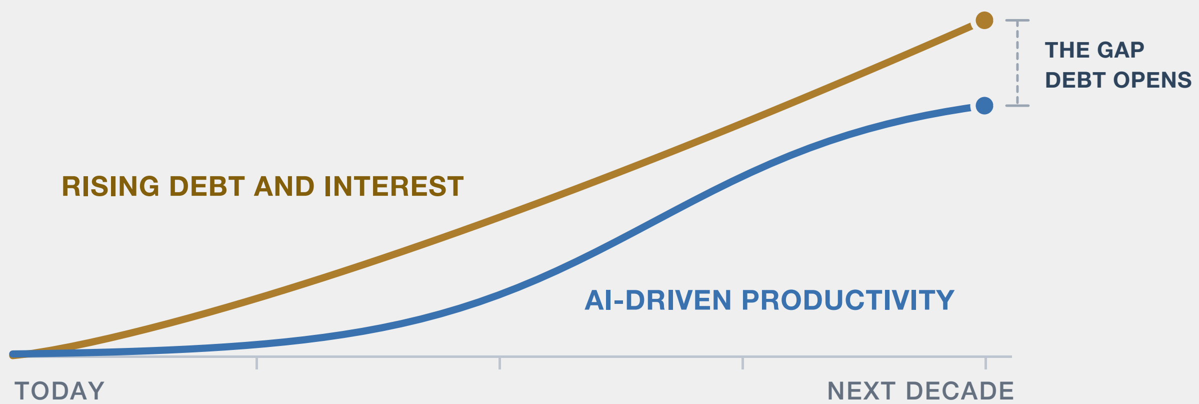
THE TECHNOLOGICAL GAMBLE

# Musk Could Be Right - and You Could Still Need a Plan.

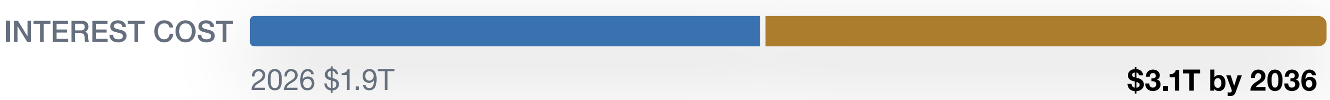
Artificial intelligence and robotics could transform productivity create new industries and lower the cost of goods and services. The question is whether those gains will be large enough, and arrive soon enough, to outrun the debt.



Illustrative only — relative trajectories, not to scale.

## THE RACE IS ALREADY UNDERWAY

Federal interest costs are projected to rise from approximately $1 trillion in 2026 to $2.1 trillion by 2036.



THE RISK IS NOT THAT AI FAILS. THE RISK IS THAT AMERICA'S DEBT PROBLEM MOVES FASTER THAN THE SOLUTION.

PREPARING FOR BOTH OUTCOMES

# Your Financial Future Should Not Depend on One Breakthrough

Diversification can help people prepare for more than one possible future.

## THE STRENGTHS OF PHYSICAL GOLD

### NOT GOVERNMENT-ISSUED

Physical gold is not created by the federal government.

### NO CORPORATE EARNINGS

Its value is not based on a company meeting quarterly targets.

### NO PROMISE TO REPAY

Gold does not depend on another party honoring an obligation.

### LIMITED NATURAL SUPPLY

New supply cannot be created with a policy decision or keystroke.

### GLOBAL RECOGNITION

Gold is recognized and traded across markets and borders.

### HISTORICAL STORE OF VALUE

It has long been used during periods of monetary and political uncertainty.

Physical gold may provide another layer of diversification for people who do not want their entire retirement dependent on government debt, the purchasing power of the dollar or the successful arrival of one technological solution.

Source: Gold characteristics and diversification framing from the attached America's Fiscal Future analysis. Precious metals involve risk and may not be suitable for every individual.

## THE CENTRAL TAKEAWAY

# America's Financial Future May Hinge On Unproven Technology.

# SHOULD YOURS?

1

**MUSK MAY BE RIGHT ABOUT AI.**

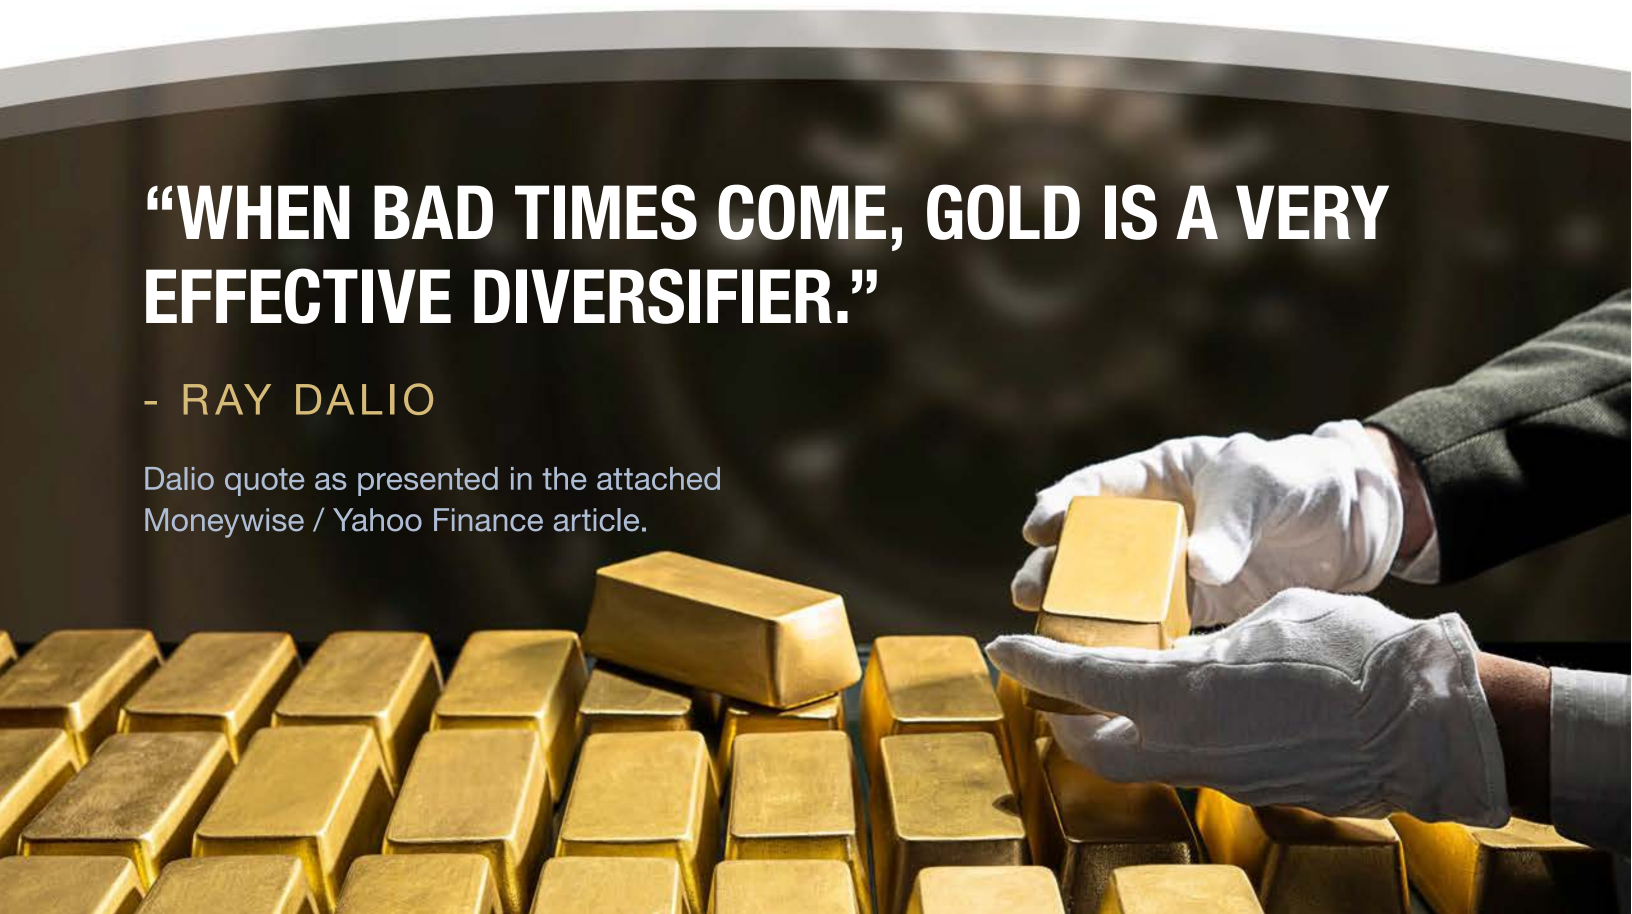
2

**HE MAY BE WRONG ABOUT THE TIMING.**

3

**DIVERSIFICATION PREPARES FOR BOTH POSSIBILITIES.**

Gold does not require the United States to collapse in order to play a useful role. It may offer portfolio diversification during the period between today's growing debt burden and the technologically abundant future Musk predicts.



## "WHEN BAD TIMES COME, GOLD IS A VERY EFFECTIVE DIVERSIFIER."

- RAY DALIO

Dalio quote as presented in the attached Moneywise / Yahoo Finance article.
